List of GUI Elements:

Main Title Canvas

Text displaying the intro for the game.

Would be displayed for a few seconds then be removed.

Main Title Canvas			
	Text		Text/Canvas would be displayed on game start then hidden to play the game.
Lower Canvas			
	Health Panel		Area for displaying player health
		Text	Health text
		Image	Image displaying player mech health with a color status. In advancing the game each area of the mech would be individually colored.
	Weapon Panel		Display of the Player's Weapons
		Text	Weapons text
		Text	Table displaying weapons for use. In more advanced implementation each row that is within range would be selectable.

	Button		Fire button that would attack the enemy.
	Button		Move button that would perform the action for the selected move card.
	Move Panel		Shows the movement cards that are selectable. Selected card is larger than others.
		Button	Movement card. If clicked, select it and makes it larger than other cards.
		Button	Movement card. If clicked, select it and makes it larger than other cards.
		Button	Movement card. If clicked, select it and makes it larger than other cards.
		Text	Shows moves left to select in the current round.
Upper Canvas			
	Health Panel		Area for displaying enemy health
		Text	Health text
		Image	Image displaying enemy mech health with a color status. In advancing the game each area of the mech would be individually colored.
	Weapon Panel		Display of the Enemy's Weapons
		Text	Weapons text
		Text	Table displaying weapons that the opponent has.

I would note that there's different degrees of having the elements implemented. I believe I've implemented the GUI for my first prototype but already see areas where I would

make changes to enhance the gameplay. However I'd rather get to a working basic model than focus on the lower level details.
